## Flower basket

### Date

1912-1926

### Primary Maker

Iizuka Hochiku

### Materials

Bamboo

### Description

Flower arranging basket made of bamboo (madake). The basket starts with a square, flat base and gradually

softens its shape to become more spherical. At the same time, the plait changes to groups of 1/4-inch split bamboo strips. This "bunching" action separates the rim into two congregations of looped sections. The handle rises from this. Handle: A group of layered strips of 1/4-inch bamboo attach at the rim area; they then twist over the basket in a shallow arc.

### Dimensions

H. 13 in × W. 12 in × D. 12 in, H. 33 cm × W. 30.5 cm × D. 30.5 cm

### Object number

2021.178
